I have contacted a lot of people in this case and got mostly nothing in return and or got more attacks on me. (Looking the other way) or in a few cases got a reply saying “wrong agency, contact such and such”. Playing “jurisdiction” games…

1. Sheriff’s Offices – Oregon, California, Washington, Nevada, Idaho, Texas, Florida, Georgia, Minnesota, New York, and maybe a couple more. Overall, I have called LEO local around 10 times in last 22 months. I have emailed LEO local and in other states around 250 Sheriff’s names, and some detectives names

2. State Police – Oregon, Washington, California, I have emailed them all at least once in the last 22 months

3. FBI – Oregon and DC Headquarters, I have called the field office 3 or 4 times and been either pushed to the hotline which hangs up on me or given the cold shoulder and they get abrasive and evasive then hang up. I have been hung up on by the FBI 3 times while trying to report crimes

4. US Military Jag, Inspector General, Centcom, Forts / Bases – Oregon, Washington, California, Texas, Nevada, Florida, Georgia, Perhaps more, I have sent out emails to around 80 different names in the jag, centcom, inspector general, Base commanders, any email I can find to US MILITARY in the last 22 months

5. State Attorneys General – Oregon, Washington, Texas, Florida, Minnesota, have all been contacted at least once in the last 22 months

6. Local / National News – Oregon, Washington, California, Idaho, Nevada, Texas, Florida, Georgia, New York, I have contacted around 200 different news channels in different cities big and small across the US and around 350 news personalities, reporters, investigative journalists and producers and got zero return emails or calls.

7. CIA / NSA / US MARSHALS – I have contacted each on at least once in 22 months. Cia hung up on me, nsa I think no answer and marshals no call back… same pattern everytime.

8. I have also used web portals to report crime to news, law enforcement, federal government like fbi, sheriff, military, and news and more on top of emails.
