List of Names, Companies, Channels, Podcasts, Songs, Movies, Officials, Actors, Singers, Etc

This is not quite a complete list of the people involved that we have actionable lawsuits on, but it is close. The song and movie list are much bigger, I have documented hundreds of movies and thousands of songs with my IP in them over the last 22 months. Each name or channel has stolen / copied anywhere from 1-3 items up to 500-1000 on the more egregious ones.

Some lawsuits are for only a few different civil infractions against me, and most are for 1 – 5000 different instances / events, I can prove of civil infractions, like copyright infringement, economic espionage, cyberstalking, fraud, and more, etc. The platforms / broadcast channels are looking at more counts due to housing mass amounts of my copyrighted property on their networks. For example, I have proof that around 1 million videos on youtube have my stolen intellectual property in them and that they are all made and posted within the last 22 months
