Hello mam or sir,

I am needing to file lawsuits on a group of companies and individuals that are cyberstalking my websites and everything I do online, stalking in person, doing illegal spying / espionage on my phone and devices as well as doing illegal espionage from the neighbor's house for my words and actions outside my house, I have proof of this because they are stealing my intellectual property, IDEAS, Marketing, Our Services, by piece meal, verbatim, and hacking up plagiarism, the putting it in their movies, marketing, songs, podcasts, news, channels, books, print, radio, broadcast tv and more. They are also doing massive fraud with some of the theft by fake back dating videos on their websites, and google youtube. I have proof of all my claims with a massive amount of direct evidence as well as a mountain of circumstantial evidence and patterns and more. I need to file lawsuits on around 300 songs and 300 movies that I can prove have my stolen property in them, it involves around 500 companies and 500 smaller channels and or businesses / civilians. It also involves the government and law enforcement but I wont be moving on those right away unless I find an attorney that wants to move on them now.

I will be looking to file a first lawsuit for stalking, cyberstalking, corporate espionage, theft and fraud with around 20 different companies and names on it for the most current theft they are doing. I would like to get a case valuation if I can, otherwise I will be looking to file for the amount I feel it is worth, this will include punitive damages on top of the reimbursement of the money they made of my said stolen intellectual property as well as make sure its removed from their content and they are blocked from doing it again with restraining orders if need be. The amount I will be choosing to sue for is around $500 Million up to $50 Billion depending on the terms and how much more theft I discover in the process of working through the lawsuit and or discovery. I would list the songs and or videos but it is over 300-800 songs and videos that are in question, JUST IN THIS ROUND.

The names are as follows: Warner Music, Universal Music Group, Hollywood records, Roadrunner Records, Rockefeller records, VEVO, Death Row Records, Shady Records, OVO, Top Dog Entertainment, Lincoln park, Red hot chilli peppers, disturbed, jayz, miley cyrus, the weekend, Kendrick lamar, drake, snoop dog, dr dre, Curtis Jackson, marshal mather, evenesence, Brittany Spears, Kanye West, post Malone, doja cat, ahrianna grande, slipknot

I am also open to breaking them up and suing separately if an attorney would prefer to do it that way so its simpler and much easier. Im open to either way forward. We also have around 1800 names or companies we need to sue overall for the same violations. This is just a start….

I also will be needing to move on a lawsuit against google / youtube for cyberstalking, stalking, theft, fraud and the punitive damages associate with it. I can prove google is co-conspiring with the channels and companies to do the fraud and theft as well as running cover for them and banning my accounts when I try to get their videos removed with my intellectual property in them. I also have direct proof of google / youtubes theft of my intellectual property and theft of my services by copying my website design for tube.Hawkx.xyz which is also a DIRECT COMPETITOR FOR YOUTUBE, its also anti trust law violations and anti competitive tactics… I can prove with hard evidence that google is housing and protecting around 1 million videos with my stolen property in them, some are full my property while others are just with bits and pieces which again, if I cant sue for theft, I can sue for stalking / espionage and use the quasi theft as evidence. I have rock solid evidence of almost all my claims.

I will be seeking around $500 billion on this one. I can prove the psycho level of egregious theft and fraud and the fact that google is the KINGPIN in all this, WITHOUT GOOGLE NONE OF THIS WOULD HAVE BEEN ABLE TO HAPPEN, THEY FACILITATED THE FRAUD…. 100% proof of that claim.

It is still active and currently going on, they are still stalking, espionage, theft of my ip / services, and fraud. If you watch what I post on my social media (kaos.hwkx.xyz) then watch my posts on the evidence website (whitesands.hawkx.xyz) you will see proof of it currently still going on, and you can just watch my kaos hawkx posts and then watch tv, radio, and internet sites like youtube and you will see my IP showing up in all kinds of channels, some with fake back dates and some with current real time dates.

More information on this can found on my business website www.hawkx.xyz

Sincerely,

Tony Elam (owner)
